# Company Overview: Expertise & Industry Reach

Comprehensive marine & offshore support across oil & gas, dredging, maritime infrastructure and energy

**Twinanchor Marine Ltd** — end-to-end marine & offshore services

Sectors: **oil & gas, dredging, maritime infrastructure, energy**

Capabilities: **asset procurement, offshore drilling support, marine logistics, engineering services**

Environments: **offshore, shallow waters, swamp terrains, inland waterways, onshore oilfields**

Value: bridges **asset owners and end users** with adherence to international safety & operational standards

Benefit: supports complex upstream & downstream projects with minimal operational downtime

# Vision & Mission — Twinanchor Marine

Africa's trusted marine & offshore partner  
delivering innovation, safety and  
sustainability

**Vision:** Become Africa's foremost and most trusted  
marine and offshore asset solutions provider, known  
globally for **innovation, operational excellence**, and  
**world-class service delivery**

**Mission:** Deliver safe, efficient, high-performance  
marine and offshore solutions that empower clients  
and drive operational success

Commitment to **sustainable maritime development**,  
environmental stewardship and positive community  
impact

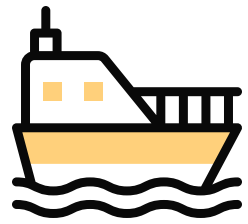

Focus on innovation, safety, efficiency and **world-class  
service delivery** to support client goals

# Core Strategic Goals

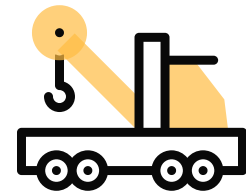

Five priorities driving Twinanchor's operational strength, local impact and digital transformation

## Diverse, high-performance fleet

---

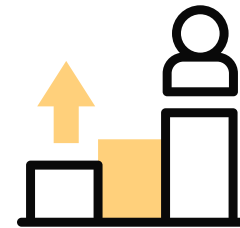

- Maintain modern vessels and equipment for operational readiness
- Optimize fleet mix to meet varied marine and offshore demands
- Support long-term reliability and cost efficiency

## Reliable marine logistics & drilling support

---

- Ensure uninterrupted supply and mobilization services
- Deliver dependable drilling support to clients offshore
- Strengthen reputation for operational excellence

## Local content growth & capacity building

---

- Invest in training and skills for African workforce
- Adopt technology to boost local industry capabilities
- Drive sustainable economic impact in host communities

## HSSE excellence

---

- Champion Health, Safety, Security and Environment standards
- Embed safety culture across operations and contractors
- Reduce incidents and protect people and environment

## Africa's largest digital marketplace for marine assets

---

- Build a platform for marine and offshore asset trading
- Enable efficient asset utilization and market access
- Drive innovation and digital transformation in the region

# Marine Vessel Procurement & Acquisition

End-to-end sourcing, inspection, class verification and delivery to accelerate asset readiness

**Vessel types procured:** AHTS, Platform Supply Vessels (PSVs), crew boats, security boats, tugboats, jack-up barges, multi-cats

**Sourcing:** international market identification and vendor selection

**Inspections & Verification:** third-party inspections and class checks (ABS, DNV, LR, BV)

**Documentation & Negotiation:** contracts, certificates, price and terms negotiation

**Delivery Logistics:** export/import clearance, transport and handover to project site

**Result:** reduced procurement risk and accelerated asset readiness for offshore/onshore timelines

# Rig Procurement, Leasing & Brokerage — Swamp & Land Rigs

Twinanchor fleet for wetlands and deep onshore campaigns; compliant, flexible, rapid-deploy solutions

## Swamp rigs — wetland mobility & fast setup

- **Swamp matting systems** enable transit across challenging wetlands
- Designed for **shallow transit drilling** and rapid mobilization
- Ideal for **marginal fields** and sensitive terrain
- Optimized for minimal ground impact and quick rig-up

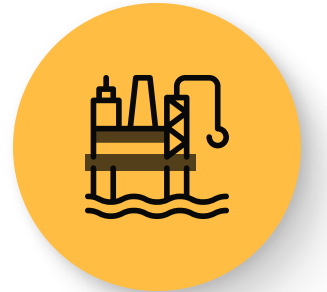

## Land rigs — high power, compliant deep drilling

- Range: **750–3000 HP** for varied campaign needs
- **Full mud systems** for complex well programs
- Built to **API/IADC** compliance and industry standards
- Configured for **deep onshore exploration & development**

# Rig Procurement, Leasing & Brokerage — Jack-Up & Modular Rigs

Capabilities summary: water depth, features, mobility,  
and cost-efficiency

**Jack-up capability:** supports water depths up to **375 feet** with high-capacity cantilevers and integrated **well control systems** for offshore exploration and development

**Modular & mobile rigs:** cost-effective, rapid deployment in tight locations; ideal for appraisal drilling

**Portfolio flexibility:** tailored solutions across offshore and onshore projects balancing **cost, mobility, and operational efficiency**

Summary: match jack-ups for mid-depth offshore work and modular rigs for rapid, confined-site appraisal drilling

**1**

**Accommodation barges housing 100–500 personnel**

---

**2**

**Work barges for fabrication and construction with large**

---

**3**

**Pipelaying & swamp barges for subsea pipeline**

---

**4**

**Flat-top transport barges for heavy cargo and modular**

---

**5**

**Crane / shear-leg barges with cranes up to 300 tons for**

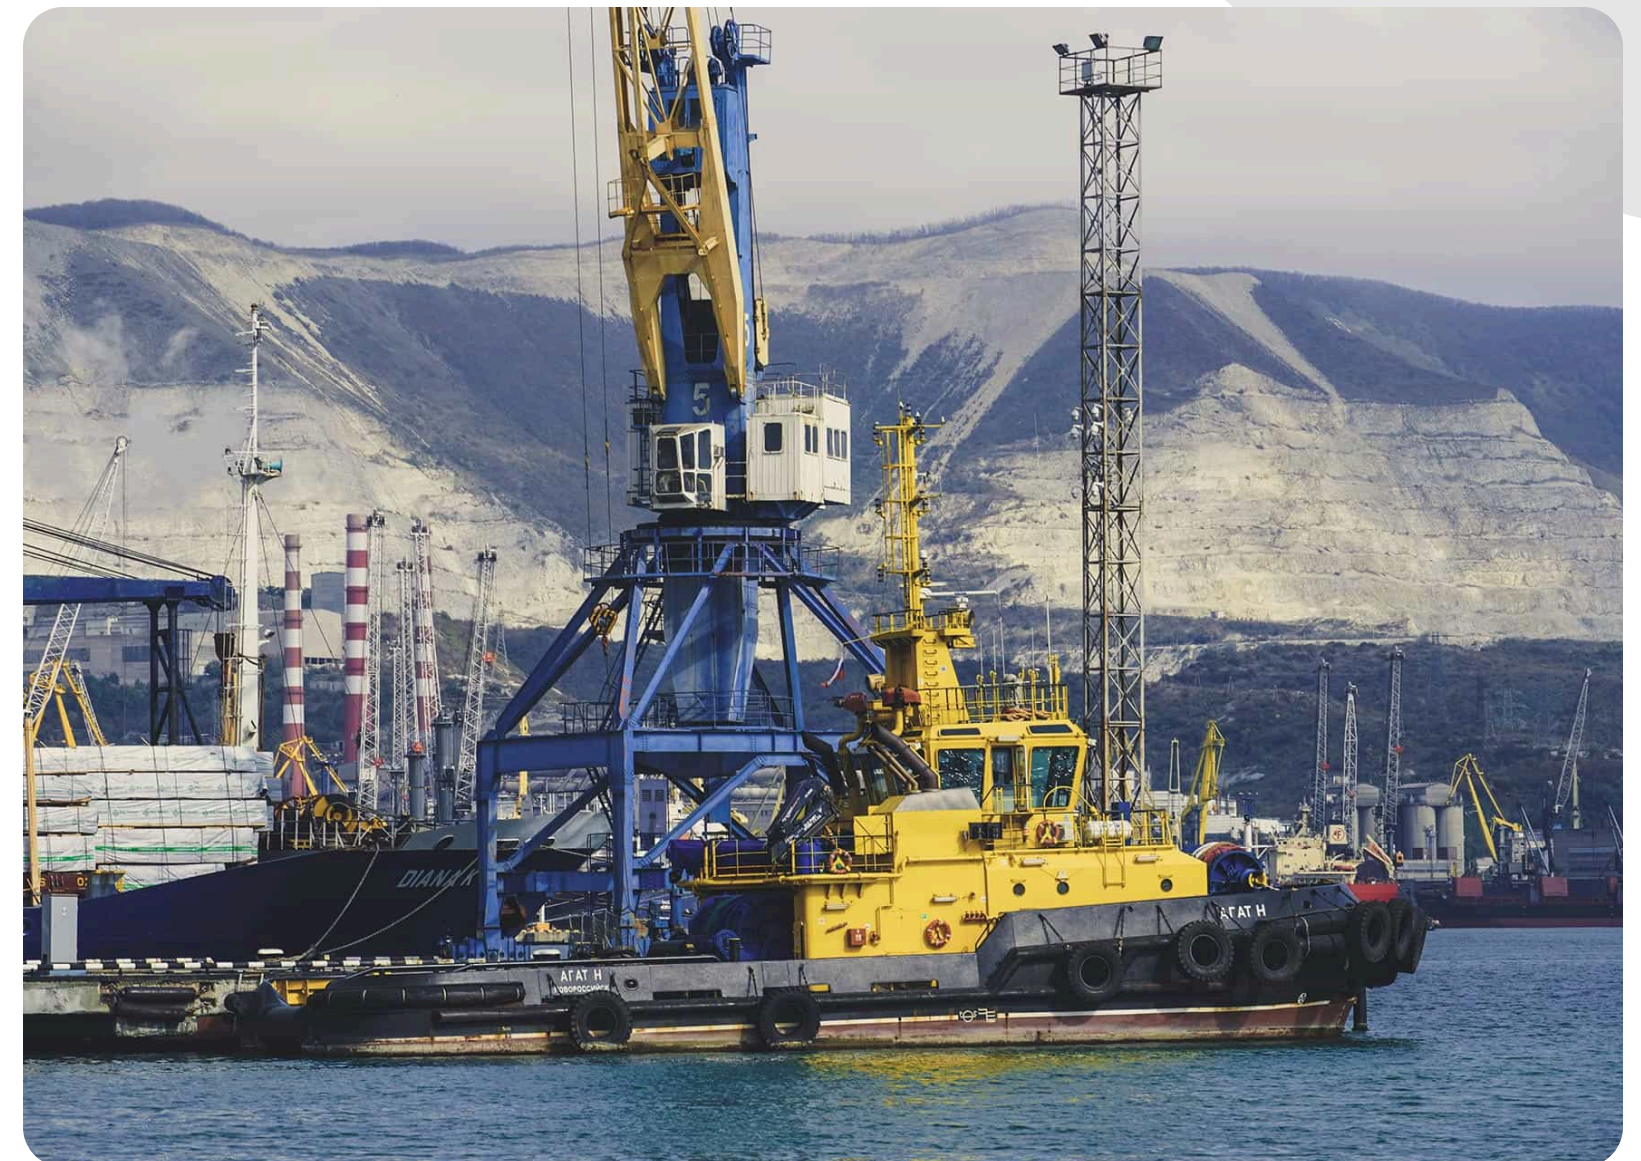

---

**6**

**Assets provide integrated utility support for complex**

# **Barge Services: Accommodation, Work & Specialized Barges**

Fleet capabilities for offshore construction, accommodation and marine logistics

# Dredging Services & Equipment Capabilities

Comprehensive dredging solutions, fleet assets, and regulatory compliance for sustainable marine operations

## 1 Dredging Services

- **Capital dredging** and port deepening
- **Maintenance dredging**, river and canalization
- **Shoreline protection** and reclamation
- **Pipeline route**, swamp and inland

## 2 Fleet & Equipment

- **Cutter Suction Dredgers (CSD)** for hard material
- **Trailing Suction Hopper Dredgers (TSHD)** for material transport
- **Booster stations, pipeline floats, sand pumps**
- **Amphibious excavators** for

## 3 Regulatory & Environmental Compliance

- Compliance with **NIWA, NIMASA, NUPRC**
- Adherence to **environmental standards** for protection
- Regulatory adherence enables sustainable operations

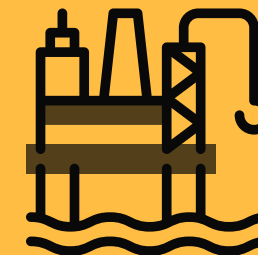

# Vessel Leasing, Chartering & Operations

Flexible spot/time charters and wet/dry leases with crew and equipment for time-critical offshore projects

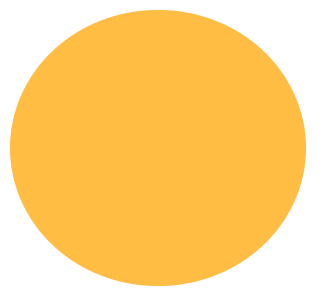

Charter types: spot charters, time charters, wet leasing, dry leasing (crew & equipment-inclusive)

Applications: offshore construction, rig moves, platform supply, personnel transfers, security patrols, marine logistics

Benefits: optimize operational costs, ensure asset availability for time-critical projects

# Vessel Management & Crewing Solutions

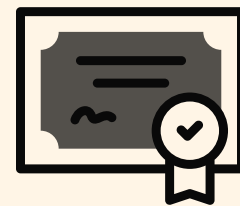

End-to-end vessel lifecycle services + certified offshore crews for uptime and compliance

Technical & Operational Management – preventive & corrective maintenance, dry-docking, performance monitoring, class renewal

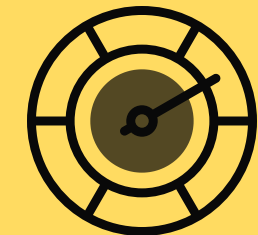

Crew Recruitment & Certification – recruitment, vetting, certification management, offshore readiness

Certified Crews – STCW, BOSIET/HUET, OSP, medical certifications

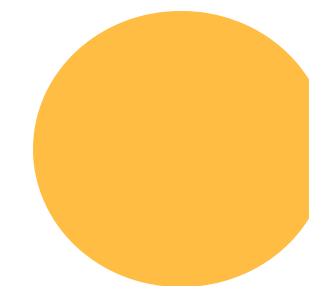

HSSE Compliance – safety systems, training, adherence to offshore regulations

Value Delivered – optimized asset readiness, improved reliability, reduced downtime risk

# Marine Equipment Construction & Fabrication

Custom modular barges, pontoons, offshore structures, deck machinery and retrofits tailored to client specs

**Modular barges** — design & manufacture of configurable units

**Marine pontoons** — custom sizes for platforms and walkways

**Offshore structural components** — frames, supports, skids

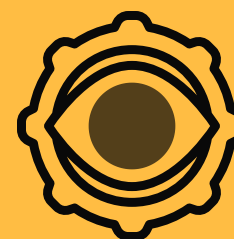

**Deck machinery fittings** — tailored winches, mounts, and gear

**Marine modules** — skids, walkways, helidecks fabrication

**Vessel refurbishments & retrofitting** — extend asset lifecycle

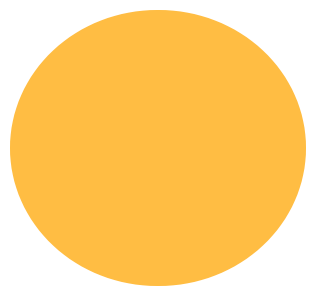

Custom solutions to client specifications — enhance resilience

# Marine Engineering & Technical Maintenance

Comprehensive mechanical, electrical and offshore support to keep assets compliant and operational

- 1 Mechanical and electrical repairs** to restore component reliability and performance
- 2 Vessel inspections & diagnostics** for early fault detection and regulatory compliance
- 3 Crane servicing and certification** to ensure safe lifting operations offshore
- 4 Navigation system upgrades** to maintain accuracy and operational safety
- 5 Hull cleaning and coating** to protect structure and reduce fuel consumption
- 6 Engine overhaul** to extend lifecycle and minimize unplanned downtime
- 7 24/7 offshore technical support** for continuous asset performance and rapid response

# Bunker Supply & Fresh Water Delivery

Reliable delivery of fuels, lubricants and potable water to vessels, offshore units and jetties

**Marine Gas Oil (MGO)** — on-demand delivery to ships, offshore installations, jetties

**Fuel Oil** — heavy fuel supply for large vessels and offshore generators

**Lubricants** — engine and machinery lubricants to maintain propulsion and equipment

**Hydraulic Fluids** — critical for deck machinery, cranes and steering systems

**Fresh Water Delivery** — potable and service water to support crew welfare and project continuity

**Operational value** — uninterrupted operations, crew welfare, and continuity in remote marine

# Offshore Catering, Vittualling & Housekeeping

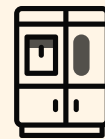

Full hospitality services for vessels, rigs and barges to boost crew wellbeing and operational safety

Twinanchor provides full hospitality for offshore **vessels, rigs, and barges**

Meal plans with **international menus** and galley management

Cold and dry **storage** management

Housekeeping, **laundry**, hygiene and sanitation services

Focus on crew **wellbeing, morale, and productivity** to maintain safe operations

# Marine Construction & Civil Engineering Works

Core services that establish safe, compliant, and efficient marine infrastructure

**Jetty construction** for vessel operations and cargo handling

**Piling operations** including driven and bored piles for marine foundations

**Shorebase development** for logistics, storage, and project staging

**Breakwater & quay wall construction** for protection and berthing

**Marine pipeline routing** for subsea and nearshore utilities

**Floating structure installation** including platforms and pontoons

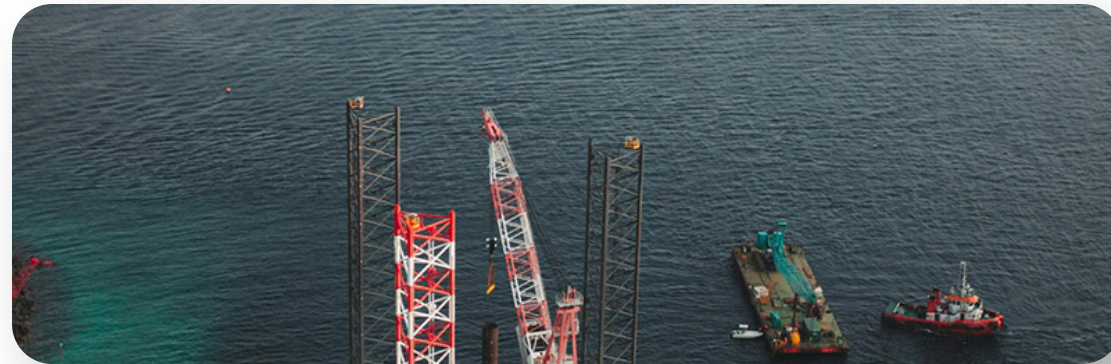

Services demand **precision, regulatory compliance, and project coordination**

# Marine Logistics, Consulting & Project Management

Operational planning, risk control, regulatory advisory and technical due diligence for offshore projects

**1 Twinanchor: offshore & marine project planning, rig and vessel mobilization strategies**

**2 Risk & Safety Audits: marine risk assessments, safety compliance reviews**

**3 Feasibility & Regulatory Advisory: regulatory guidance and market intelligence**

**4 Asset Valuation & Technical Due Diligence: informed investment decisions for clients**

**5 Benefits: optimize resources, mitigate risks, ensure regulatory compliance**

# Twinanchor Digital Marine Marketplace Overview

Instant search, compare and book vessels, rigs and marine equipment across Africa

**Asset breadth:** vessels, barges, swamp rigs, land rigs, jack-up rigs, marine equipment, dredgers

**Instant booking:** search, compare and book available vessels instantly

**Transparency:** clear listings and comparisons to enhance visibility

**Operational efficiency:** faster asset utilization and reduced downtime

**Digital innovation in Africa:** platform demonstrates Twinanchor's commitment to modern marine logistics

# Real-Time Chartering & Spare Parts Hub

Instant vessel booking plus OEM & aftermarket parts to cut downtime and boost offshore responsiveness

**Real-time chartering** — search and book vessels instantly to accelerate mobilization

**Spare parts hub** — OEM and aftermarket marine components for maintenance and repairs

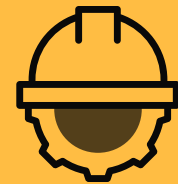

Reduced asset **downtime** — faster repairs and immediate vessel access

Improved client **responsiveness** in fast-paced offshore operations

Supports end-to-end offshore needs for Twinanchor Marine Ltd

# Crew & Vendor Network: Fast, Certified, Collaborative

Connect certified marine personnel and trusted suppliers to streamline projects and asset management

Crew & Manpower Exchange connects clients with **certified marine professionals**

Vendor network links **shipyards, service providers, surveyors, fuel suppliers, contractors**

Fosters a **collaborative ecosystem** for marine project delivery

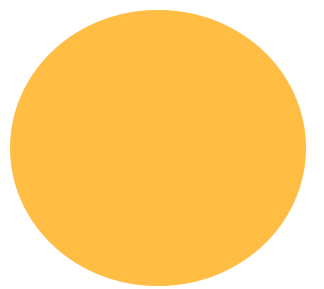

Streamlines asset management and project execution

Single marketplace for staffing, services, and supplies

# Digital Leadership in African Marine Logistics

Twinanchor drives asset visibility, faster chartering, and connected workforce across African maritime projects

Integrated **asset listings** and **real-time chartering** for faster deployment

Visible **spare parts availability** to reduce downtime

Workforce **connectivity** to coordinate crews and contractors

Improves **asset utilization**, lowers transaction friction, accelerates project execution

Aligns with global move toward maritime **digital ecosystems**

# Twinanchor's Strategic Position & Market Impact

Integrated marine services + digital marketplace driving safety, local content, agility, and growth across African waters

## Integrated service & digital platform

End-to-end marine and offshore services plus a digital marketplace for optimized logistics and procurement.

## Safety & operational excellence

Commitment to safety and operational standards for complex marine environments.

## Local content development

Invests in local capacity building to support sustainable regional growth.

## Agility, risk management & growth

Integrated approach enables rapid response, risk mitigation, and scalable, sustainable expansion.
